IDENTIFIERS *Communication Apprehension

ABSTRACT

This 243-item bibliography represents a preliminary step in the collection and synthesis of research in communication apprehension. No qualitative criteria were used in the selection of items for this bibliography, except that the item had to deal with apprehension as a major part of the report. Basic texts that mention apprehension but that do not extend either the theoretical or empirical knowledge of the area were excluded. Works concerning reticence, stage fright, speech anxiety, and similar constructs, whether directed toward public speaking or the interpersonal context, were included. Also included were listings of materials relevant to apprehension of writing. (Author/RB)

This bibliography represents a preliminary step in the collection and synthesis of research in communication apprehension. No qualitative criteria were used in the selection of items for this bibliography, except that the item had to deal with apprehension as a major part of the report. Basic texts that mention apprehension, but do not extend either the theoretic or empirical knowledge of the area were excluded.

Communication apprehension in this bibliography is considered to be a broad based anxiety about communication with other people. Thus, works concerning reticence, stage fright, speech anxiety, and similar constructs, whether directed towards public speaking or the interpersonal context were included. Also included are listings of materials relevant to apprehension of writing.

Acknowledgement is made to Dr. James McCroskey, West Virginia University and Dr. Gustav Friedrich, Purdue University, for their assistance in the preparation of this bibliography.
